

## The World's First Rollercoaster and Other Amazing Inventions

By Mile Barfield and Franziska Hollbacher

A fascinating, colourful non-fiction book explaining how and when lots of interesting things were invented.

The information is presented in comic strip form on the left page and as an information text on the right page.

Another invention in this book is Bubble Wrap. Did you know it was first invented as a wallpaper? This was not successful so it was then used to insulate greenhouses. When that failed it eventually was used as wrap to protect breakable objects.

Dive in and find out about many more interesting inventions!
