

The Dragon Machine

By Helen Ward

The Dragon Machine is a book that I used to share with my son, Luke, when he was little. It is a gentle story about George, a little boy who doesn't feel like he fits in, or is important. It tells how George becomes aware of dragons hiding all around him. It is a story about imagination, friendship and, of course dragons. The illustrations by Wayne Anderson are beautiful and there are lots of dragons to look out for.
